Internship

In my internship with Solidify, I played a role in improving their official website, which was built using **React**, **Node.js**, **TypeScript**, and **Tailwind CSS**. I worked with a headless CMS to fetch and manage the website content, effectively performing a range of tasks from debugging existing features to developing new interactive elements. I consistently adhered to design specifications to maintain a cohesive and intuitive user experience. You can view my work on their 'About' page here: <https://solidify.dev/about>

The Change Group International Plc

Substitute Sales Manager

As a Substitute Sales Manager overseeing four stores and a team of 21 employees, my multifaceted role spanned recruitment, schedule management, staff training, and adherence to Anti-Money Laundering (AML) regulations. I was committed to maintaining high company standards, managing customer and internal complaints, and upholding a strong service ethic across all locations.

As a mentor, I coached staff members on conducting transactions involving foreign currency sales, bill payments, and money transfers outside of Sweden, and provided support for complex transactions. I also performed regular audits on transaction records and cancellation procedures to ensure accuracy and identify areas for improvement.

In addition to my operational responsibilities, I played a role in marketing initiatives, salary negotiations, and maintained the integrity of essential paperwork. I ensured the successful execution of the company's training program, focusing on ethical selling practices and regulatory compliance. My method included active listening during sales conversations, providing constructive feedback, and ensuring all team members fully understood and applied their training.
